## High Power COB /大功率 COB

### CP1919 34W series /CP1919 34W 系列

#### Features /特性

- High Power & High Ra COB / 大功率 & 高显色 COB
- Multi-Chips Solution / 多芯片解决方案
- High luminous intensity output / 高亮度
- RoHS compliant / 符合 RoHS
- Compliance with Energy Star / IEC60081 Binning / 符合能源之星 / IEC60081 标准

#### Description /描述

Runlite's Aluminum based COB can achieve high efficiency and high Ra that compliance with Energy Star / IEC60081 standard.

源磊 COB 产品采用铝基板导热，具有高光通量，高光效，高显指的特性，符合能源之星 / IEC60081 标准

#### Applications /应用

- Down light / 筒灯
- Spot light / 射灯

## Part Number Explanation /产品编码解说

C P 1919 L 34-36 02 W 29S P2P3 F R3R8-0000

C=Product Category/产品类别

P=Product Configuration/产品结构

1919=Product Dimension/产品尺寸

L=Base Material/基板材质

34=Product Power/产品功率

36=Chips in Serial/芯片串联数目

02=Chips in Parallel/芯片并联数目

W=Light Colors/发光颜色

29S=CCT or Wavelength/色温或者波段

P2P3=Brightness/亮度范围

F=Ra/显色指数

R3R8=Voltage Range/电压范围

0000=Serial NO/产品流水码

## Table of Ra /显色指数表格

Symbol / 符号	Description/ 描述
A	No Requested/没有要求
B	60-65
C	65-70
D	70-75
E	75-80
F	80-85
G	85-90
H	90-95
I	95-100

Note/备注:

Tolerance of Ra:  $\pm 2$  显色指数  $\pm 2$

## Mass Production List / 量产清单

Part Number / 产品型号	Ra	CCT(K)	Φ(lm)	Φ(lm)
	Min.(1)		Min. (2)	Max. (2)

## Reliability Test Items / 信赖性测试项目条件

The reliability of products shall be and Conditions below items.

Confidence level : 90%

LTPD : 10%

Test Item 测试项目	Test Conditions 测试条件	Duration/Cycle 持续周期	Quantity 数量	Ac/Re 接收/拒收
Thermal Shock 冷热冲击	-40°C 30min  ↑↓ 5sec  100°C 30min	500 times  循环 500 次	22PCS	0/1
High Temperature Storage 高温储存	Ta=100°C	1000 hours 1000 小时	22PCS	0/1
High Humidity & High Temperature 高温高湿	Ta=85°C  RH=85%	1000 hours 1000 小时	22PCS	0/1
Low Temperature Storage 低温储存	Ta=-40°C	1000 hours 1000 小时	22PCS	0/1
High Temperature Operatiur test 高温老化	Ts=105°C  IF=300mA	1000 hours 1000 小时	22PCS	0/1

## COB LED instruction manual/COB 型 LED 使用说明书

Thanks for using our COB product! Avoiding unnecessary damage to the product that due to mishandle, we are providing you the following guide lines. Please keep in mind that the application has good performance, not only the LED package, but also related to working condition, operation method and whole system design. The recommendation can't covers all application details, hope you can care of this.

感谢您使用我们的 COB 产品，为增进您对我公司产品特性的了解，也为方便您快速掌握产品的基本操作。为尽量减少或避免因人为等因素造成不必要的产品损坏，使其能够更好的为您的生产服务，特针对使用过程中的一些规范使用作相应说明，同时即使是同一规格 LED，在实际应用领域其可靠性与整体系统设计水平、作业方式、使用条件均相关。本使用说明不可能涵盖客户使用过程中可能碰到的所有问题，由此带来的不便，敬请谅解！

### 1. Features:

COB LED is consisted of substrate and silicone in appearance. Positive and negative electrodes on the substrate surface. LED chips are mounted on the substrate and connected by wires, which are covered / protected by silicone with phosphors. Compared with SMD LED, COB LED can directly mount on the heat-sink with soldering and reflow process, that providing a good thermal performance, the luminaire can achieve compact design.

#### 1. 产品特征：

COB 型 LED 封装的构造有基板和硅胶组成，基板由正电极和负电极构成，同时，硅胶部分的基板上贴有 LED 元器件，并使用带有荧光胶的硅胶进行封装。与 SMD 型 LED 封装不同，COB 型 LED 封装可直接安装与散热器上。此外，通过直接将 LED 元器件贴于基板上保证其优异的散热性。使用 COB 型 LED 封装可实现灯具的小型化设计。

#### 2. Attention before usage

2.1. Once the packing of the COB LED is recommend in room temperature (20-30C) with dry ( $\leq 50\%$ ) cabinet or box, which in order to prevent water absorption. It needs to dry bake if the product exposed to air more than 24hours or storage exceed 3 months in packing, the baking condition is 120C/2 hrs.

2.2. Products are keep in plastic tray with ESD bag when transportation, handle with care is need to preventing the damage and failure.

2.3. Handling issue improper will affecting the product performance. No touch of silicone surface, such as finger, nipper, soldering iron, etc; high external stress will cause failure. It is recommend to wear gloves for assembly and not contaminate the product.

#### 2. 使用前注意事项：

2.1、开包装前避免湿气进入 LED 内部，建议 COB 系列 LED 存放在内置干燥剂的干燥柜中，储存环境为温度 20-30°C，湿度不超过 50%。若存储时间超过 3 个月，LED 需要重新除湿（120°C/1-2 小时）。若开包装的 LED 当天未使用完请及时存放干燥柜中，超过 24 小时的请重新除湿（120°C/1-2 小时）再使用。

2.2、COB 型 LED 封装产品在交付时使用托盘包装，在搬运的过程中请勿施加外力挤压，外力挤压会导致产品不亮灯，因此请注意切勿用手指等接触托盘内部。

2.3、不当的产品拿取方式可能会对产品的光学特性及使用寿命造成影响。特别注意不要对硅胶部分施加外力，否则可能会导致产品不亮灯，拿取材料请佩戴防静电手套，切勿徒手接触产品，徒手接触发光部分可能会弄脏表面，从而影响其光学特性。切勿使用镊子等头部较为锐利的工具夹取，与硅胶部分接触可能导致金线断线，从而引发不发光或发光闪烁故障。

### 3. Operation attention

3.1. Silicone is soft and use for the protection of chips and wire, please avoid pressing and touching surface, which causing early failure and performance degrade.

3.2 Handle with care when product assembly and to prevent stack up the products.

3.3. The product is not suitable for the reflow process. Using constant temperature soldering for wires connection, tip of iron should be below 350C and not more than 5 seconds. Soldering point is not recommend to continue welding, it should be cooling down first before re-soldering. Soldering wire and flux should not be touch or contaminate the silicone surface.

### 3、操作注意事项：

3.1、硅胶部分由发光部位和围胶构成，通过围胶成型，请避免对硅胶部位按压或与尖锐的金属接触，否则可能会影响产品的功能及可靠性。

3.2、装入灯具时请勿将硅胶部位与其他组件接触，为防止硅胶部位出现剥落，断线或缺损等情况，请勿将本产品重叠放置。

3.3、本产品部不适合进行回流焊，因此在进行焊接时推荐使用恒温电烙铁，功率在 30W 以内，烙铁头温度在 350 度以下，加热时间在 5 秒以内，不要重复对光源焊接，因当焊接完成一个焊盘待冷却以后再焊接另一个焊盘。注意焊接的引线不要碰触到硅胶部位和铝基板边缘。

### 4. Installation

4.1. It suggests to use M3 screws to mount the product on heat sink. Not touch the silicone when screwing. In order to have good heat dissipation, thermal grease is needs to apply between bottom of COB LED and heat sink surface. It needs to prevent thermal grease the silicone surface.

4.2. COB LED light performance is direct related to input power and operation temperature, heat sink must used for lower the product temperature, the Junction Tj control very important and should not exceed the maximum rating.

### 4、安装方法：

4.1、对 COB 型 LED 封装组装时建议使用 M3 螺丝固定在散热器上，在扭螺丝的过程中切勿对硅胶施加外力。为提高产品的散热性能，请在 LED 封装与散热器之间使用优质导热膏，请将其均匀涂抹在 LED 封装的背面。

4.2、LED 元器件会根据输入的功率而发光和热，但是 LED 封装的表面积非常小，仅靠封装本身向大气进行散热几乎无法实现，因此需要散热片等外接散热器。LED 封装中元件接合点温度 Tj 管控十分重要，在任何条件下均不可以高于规格书中规定的绝对最大额定值。

### 5. Powering method

5.1. COB LED should driving by a constant current source, constant voltage driver is not recommend to use, which will easily damage the product.

5.2. Please to avoid surge current when power on and off, when should not higher than the product maximum current rating.

### 5、驱动方式：

5.1、LED 为恒流驱动器件，客户在选定电源需要根据光源的电流额定电流选择电源的输出电流和电压，防止电流过大烧坏光源或影响性能。

5.2、LED 封装与电容器等容性负载连接时，在开关转换瞬间可能会产生浪涌电流，在使用时应尽可能避免产生浪涌电流，但当无法避免时请采取措施，确保其低于产品的绝对最大额定值。

### 6.Cleaning

Please suing isopropyl alcohol for cleaning only if necessary. Please make sure or test first if use other cleaning agent that not affect the silicone/product performance.

### 6、清洁清洗：

建议使用异丙醇来清洁 LED，如果要采用其他溶剂清洁，一定要确保此溶剂不会对硅胶、支架镀银层等产生影响。若不可避免，清洗前请事先进行试验，以确认是否对 LED 造成不良影响或潜在性隐患。

7. Other attentions

- 7.1 . White LED is made by blue chip and phosphors, the emitting color will change along with driving current. Please take consideration for the design.
  - 7.2. The product do not design for anti-radiation.
  - 7.3. When COB LED directly expose to sunlight or UV for the period of time, the product surface will yellowing and performance degrade.
  - 7.4. Maintain good performance of COB LED, no cleaning, touch, contaminate and covering the silicone materials.
  - 7.5. It is recommend to cover or coating other gel or resin on top of silicone surface.
  - 7.6 . The electrodes on substrate are plated with silver, which is easily react with some element, such as sulfur, halogen(fluorine, chlorine, bromine, Iodine) and oxygen. Soldering and performance degrade will be happen after the chemical reaction.
  - 7.7. The product is compliance with RoHS. Which is design for general lighting. Please contact us with different applications.
7. 其他注意事项：
- 7.1、白光 LED 是由蓝光芯片和特种荧光粉组合。因此 LED 的发光颜色会随着工作电流的变化而变化，使用前应考虑此因素是否能达到预期效果。
  - 7.2、产品的应用不适用于抗辐射的设计。
  - 7.3、LED 长时间暴露在阳光或偶尔暴露在紫外线下可能导致胶体或透镜黄变。
  - 7.4、为保证 LED 光电性能，请保持 LED 发光区域表面清洁，避免手指印或其它异物覆盖。
  - 7.5、不建议在 LED 的硅胶表面覆盖其他与之不兼容的脂类物质。
  - 7.6、LED 支架表面处理采用镀银工艺，单质银易与硫、卤素（氟、氯、溴、碘）等元素发生反应，导致 LED 外观及光色发生变化。故请客户在组装及应用过程需排除上述元素（含灯具、电源原材料，车间生产环境等），避免上述元素与 LED 镀银层发生反应致 LED 失效（光衰、色温漂移、死灯等）。
  - 7.7、产品符合 RoHs 指令，产品主要应用在一般照明。其他领域应用请事先联系我们。
